Report on Mortgage Insurance Accounts

Report on Recoverable Cost Charges

This annual report reflects the status of accounts for all Farm Ownership borrowers who received a cash or non-cash loan to purchase, enlarge, or improve a family-type farm since the beginning of the program through March 31, 1953.

Accounts for active and collection-only borrowers and borrowers paid in full by any method are reported in tables captioned total borrowers. Tables 3, 5, 7, 9, 11, and 14 show cumulative annual installments, regular payments, and schedule status for direct loan active borrowers and tables 17 and 18 show the mortgage insurance accounts and schedule status for insured loan active borrowers. In prior years, similar tables were reported for borrowers with unpaid balances, including collection-only.

Tables 2 and 13 have been added to the report this year to show the loans, payments, and principal balance for direct loan active borrowers. The same information for all direct borrowers, including collection-only and paid up, is reported in tables 1 and 12.

Tables 19 through 24 report the accounts for all direct loan borrowers paid in full during the year. These tables show the borrowers paid in cash and those paid through transfer or conveyance of title to the Government. Tables 28 through 33 cover accounts for all direct loan borrowers paid in full by any method, cumulative through the end of the period.

The insured loan borrowers paid in full are reported in three groups to show those paid in cash, through sale of farm within program, and through refinancing in connection with a subsequent loan. Tables 25 through 27 cover the borrowers paid in full during the year; tables 34 through 36 report those paid in full cumulative through March 31.
